

## OZONE DAY CELEBRATIONS-2023

The Post Graduate and Research Department of Chemistry at St. Joseph's College, Moolamattom, celebrated Ozone Day 2023. On September 18, 2023, a quiz competition was organized. Simultaneously, a logo-making competition was held, and entries were accepted until September 19, 2023. About 90 students across various departments participated in these competitions. The winners of both competitions were awarded prizes.

These initiatives not only raised awareness about ozone preservation but also showcased the talent and engagement of the students in promoting environmental consciousness.
